OUTLINE

- Introduction to URSA AS
- URSA Essential DW + D overview
- URSA Essential DW + D technical details
- Our team
- Our products and packages
- How to contact us

WHAT OUR CUSTOMERS SAY

“RELIABLE WORLDWIDE SERVICE
COMPANY”

URSA AS

- URSA (an IMPA approved supplier) is a Norwegian-based company dedicated for service and maintenance of equipment on ships, like BWMS and a new series of drinking water and disinfectant equipment, the URSA Essential Water Systems
- URSA Essential Water Systems offer a sustainable alternative to bottled drinking water and disinfection liquid. We help ship owners save costs, and most of all, help reduce ships' environmental footprint by reducing plastic litter
- We are represented with technicians and engineers in Korea, China, Singapore, Germany, Brazil, Houston (US), UAE, Lebanon, Norway and Panama
- URSA is expanding its business and guarantees fast and timely provision of machines and consumables from the locations above

URSA ESSENTIAL WATER SYSTEMS

The future of sustainable systems on ships

Cost effective solutions that help ship owners eliminate bottled water and contribute to cleaner oceans

- Reduce your plastic footprint on ships
- Save on transportation, loading and storage cost
- Reduce chemicals needed onboard
- Enhance fleet's sustainability commitment

URSA Essential Water Systems

URSA ESSENTIAL DW (DRINKING WATER)

- Ultra Filtration system (pre-filter + 4-stages filtration)
- NSF Approved
- Robust metallic cabinet
- Do-it-yourself installation
- Low-cost filter replacement

PRE-filter	Sediment	Carbon	UF	Mineral
Removes dirt, rust and impurities from the water	Maximizes the effect of purification by removing soil and sand	Removes chlorine, THM and organic chemical contaminants	Removes microorganisms, harmful organic chemicals etc.	Supplies useful electrolytes and levels the pH

URSA ESSENTIAL D (DISINFECTION)

Our ECA (Electrochemical Activation) machine produces a safe solution that is extremely effective against viruses helping to keep crew, surfaces and floors free from viruses and bacteria.

- Certified Food Safe
- Non-toxic, non-hazardous, non-allergenic liquid
- Production requires just salt and water
- Kill rate up to 99.9999%
- Destroys biofilm in pipes where waterborne bacteria such as legionella and Cryptosporidium live
- ECHA Product Type Approved for use: PT1...PT5

URSA ESSENTIAL D (DISINFECTION)

Ships applications: one machine can help save on many galley and accommodation products

- Chlorine vegetable sanitizer
- Bleach liquid
- Hand sanitizer / Liquid hand soap
- All purpose / antibacterial cleaner liquid
- Kitchen liquid spray sanitizer
- Glass/Window/Mirror cleaner
- Basin & toilet bowl cleaner
- General toilet/shower cleaner
- Powder cleanser
- Foaming bactericidal cleaner
- Food Surface Sanitizer
- Floor & surface cleaner
- Laundry Powder

OUR TEAM

Elite Barakat
Lebanon Office – Logistics Assistant

Elite is a young talent that will provide all necessary logistics and bookkeeping, including sales support, to bring the equipment as promised to the client.

Andreas Kyriakides
Cyprus Office – Sales & Business Development

Andreas has key knowledge of the product and will act as Single Point of Contact to the organization. He will have a team assisting him in sales and after sales, as well as follow up towards technical / installation issues and maintenance.

Terry Seo
Korea Office – Production Manager

Terry will be responsible for assembly and sending out the drinking water product from Korea to our local sites or to the client directly. Terry and his team in Korea has a wide network of local industry in Busan and will provide technical assistance where needed.
